material: [premium set](#) (epoxy resin)

colour: RAL6020, chrome oxide green

realisation: private customer

DeinTeich.de

Teich Pool Dach

This idyllic GRP swimming pond was coated with the DeinTeich.de [premium set](#) with epoxy resin and glass fabric.

For the pond made of GRP (glass reinforced plastic), the [HP-E80FS epoxy resin](#) was first applied as a primer to the concrete substrate. This was followed by the laminate, consisting of the [laminating resin HP-E30TLS](#) and three layers of [glass fabric HP-B320/635E](#). This gives the GRP garden pond the necessary strength and stability.

In the last step, the [epoxy resin system HP-E30TDS](#) was used for the coloured top layer (RAL 6020-chrome oxide green).

Whether you want to build a GRP garden pond, swimming pond or whirlpool yourself - DeinTeich.de offers the right coating set for your project!
