

# garden pond | 30m<sup>2</sup>

#T02

#yourprojects

size: 30m<sup>2</sup>

material: [premium set](#) (epoxy resin)

colour: RAL6020, chrome oxide green

realisation: private customer

DeinTeich.de

Teich Pool Dach

For this GRP garden pond, the DeinTeich.de [Premium-Set](#) with epoxy resin and glass fabric was used.

For the pond made of GRP (glass reinforced plastic), the [priming resin HP-E80FS](#) was first applied to the concrete substrate.

This was followed by the laminate, consisting of the [laminating resin HP-E30TLS](#) and three layers of [glass fabric HP-B320/635E](#). This provides the necessary strength and stability for the GRP garden pond.

Finally the [epoxy resin system HP-E30TDS](#) in RAL 6020-chrome oxide green was applied for the top layer.

Whether you want to build a GRP garden pond, swimming pond or whirlpool yourself - DeinTeich.de offers the right coating set for your project!
