[DeinTeich.de](#)
Teich Pool Dach

The GRP koi pond was coated with the DeinTeich.de [premium set](#) with epoxy resin and glass fabric.

First, the [epoxy resin HP-E80FS](#) was applied to the concrete substrate.

This was followed by the laminate, consisting of the [laminating resin HP-E30TLS](#) and three layers of [glass fabric HP-B320/635E](#), which provided the necessary stability and strength.

In the final step, the [HP-E30TDS epoxy resin system](#) was used for the colored top coat (RAL 6020-chrome oxide green).

Whether you want to build a GRP garden pond, swimming pond or whirlpool yourself - DeinTeich.de offers the right coating set for your project!
