#yourprojects

size: 560m<sup>2</sup>

material: [premium set](#) (epoxy resin)

colour: RAL6020, chrome oxide green

realisation: company

DeinTeich.de

Teich Pool Dach

The company worked with the DeinTeich.de [Premium Set](#) with epoxy resin and glass fabric.

In the first step, the [epoxy resin HP-E80FS](#) was applied to the concrete substrate as a primer for the pond made of GRP (glass reinforced plastic). The subsequent laminate consists of the [HP-E30TLS laminating resin](#) and three layers of [HP-B320/635E glass fabric](#).

It gives the GRP garden pond the necessary strength and stability. Finally, the [HP-E30TDS epoxy resin system](#) was painted on for the colored top layer (RAL 6020-chrome oxide green).

Whether you want to build a GRP garden pond, swimming pond or whirlpool yourself - DeinTeich.de offers the right coating set for your project!
