

koi pond | 140 m²

size: 140m²

material: [premium set](#) (epoxy resin)

colour: RAL7016, anthracite grey

realisation: company

#T08

#yourprojects

[DeinTeich.de](#)
Teich Pool Dach

For this project, a GRP koi pond, the DeinTeich.de [Premium Set](#) with epoxy resin and glass fiber was used.

In the first step, the [priming resin HP-E80FS](#) was applied to the concrete substrate. This was followed by the laminate, consisting of the [laminating resin HP-E30TLS](#) and three layers of [glass fabric HP-B320/635E](#) for the necessary strength and stability of the GRP koi pond.

The [epoxy resin system HP-E30TDS](#) was used for the colored top coat (RAL 7016-anthracite grey).

Whether you want to build a GRP garden pond, swimming pond or whirlpool yourself - DeinTeich.de offers the right coating set for your project!
