size: 55m²

material: [premium set](#) (epoxy resin)

colour: RAL 5012, light blue

realisation: private customer

DeinTeich.de

Teich Pool Dach

For this GRP pool the DeinTeich.de [premium-set](#) with epoxy resin and fiberglass fabric was used.

For the pool made of GRP (glass reinforced plastic), the [priming resin HP-E80FS](#) was first applied to the concrete substrate.

This was followed by the laminate, consisting of the [HP-E30TLS laminating resin](#) and three layers of [HP-B320/635E glass fabric](#).

This provides the necessary strength and stability for the GRP pool.

Finally, for the top layer, the [epoxy resin system HP-E30TDS](#) in RAL 5012-light blue was applied for the top coat.

Whether you want to build a GRP garden pond, swimming pond or whirlpool yourself - DeinTeich.de offers the right coating set for your project!
