[DeinTeich.de](#)
Teich Pool Dach

For this GRP pool the [DeinTeich.de premium PLUS-set](#) with epoxy resin, fiberglass fabric and polyurethane top coat was used.

For the pool made of GRP (glass reinforced plastic), the [priming resin HP-E80FS](#) was first applied to the concrete substrate.

This was followed by the laminate, consisting of the [HP-E30TLS laminating resin](#) and three layers of [HP-B320/635E glass fabric](#).

This provides the necessary strength and stability for the GRP pool.

Finally, for the top layer, the [HP-PUR-PLUS polyurethane](#) in RAL 1014-ivory was applied for the top coat.

Whether you want to build a GRP garden pond, swimming pond or whirlpool yourself - [DeinTeich.de](#) offers the right coating set for your project!
